DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-16,39,41,43,62,64-71,78-86 are rejected under 35 U.S.C. 102(b) as being anticipated by Komer (US 5773422; 6/30/98). Komer teaches a non-aqueous antiparasitic composition comprising polysorbate 80 (emulsifier), propylene glycol (polyol), n-methylpyrrolidone, benzyl alcohol, and ivermectin or oxytetracycline. Komer teaches that the composition can be diluted with water and the composition is topically applied. See abstract, column 2 line 10 – column 6 line 31.

Claims 62,64,65,67-71,78-86 are rejected under 35 U.S.C. 102(b) as being anticipated by Lo et al (EP 045 655; 2/10/82). Lo teaches a non-aqueous composition comprising polysorbate 80 (emulsifier), propylene glycol (polyol), n-methylpyrrolidone, benzyl alcohol, and ivermectin. Lo teaches that the composition can be diluted with water and the composition is topically applied. See abstract, page 2 line 9 – page 6 line 10.

Claims 62,64,65,67-71,78-86 are rejected under 35 U.S.C. 102(b) as being anticipated by Grant et al (WO 9818463; 5/7/98). Grant teaches a non-aqueous antiparasitic composition comprising polysorbate 80 (emulsifier), propylene glycol

(polyol), n-nethylpyrrolidone, benzyl alcohol, and ivermectin. Grant teaches that the composition can be diluted with water and the composition is topically applied. See abstract, page 1 line 4 – page 5 line 21, page 9 line 15-28, page 14 lines 1-20

Claims 78-81,84,86 are rejected under 35 U.S.C. 102(b) as being anticipated by Lo on record. Lo teaches a non-aqueous composition comprising ivermectin (biological active), Tween 80 (emulsifier), glycerol formal (polyol) and benzyl alcohol (monohydric alcohol). The composition can be diluted with water. Lo teaches a method of administering the above composition via injection. See abstract, column 4 lines 41-46.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 42 is rejected under 35 U.S.C. 103(a) as being unpatentable over Komer on record as applied to claims 12-16,39,41,43,64-71,78-86 above in view of Grant on record. Komer teaches all that is recited in claim 42 except for the invention comprising abamectin. However, Grant teaches that an antiparasitic composition comprising abamectin. It would have been obvious to one having ordinary skill in the art to modify the composition of Komer to include the abamectin taught by Grant. One would have been motivated to do this in order to enhance the overall effectiveness of the antiparasitic composition.

Other Matters

Claims 59-61 are depended from cancelled claim 52. Please correct.

Claim Objection / Allowable Subject Matter

Claims 40, 44,63 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 58,72-77 are allowable. The prior art does not teach or suggest applying benzyl alcohol to plants or crops or ground. The prior art does not teach or suggest administering instant formulation of claim 58 in the drinking water of animals.
